

Muhammad Kamran Janjua

+1 (587) 938-6448 — <https://kjanjua26.github.io/> — mjanjua@ualberta.ca

EDUCATION

University of Alberta

Master of Science in Computing Science, CGPA 3.80/4.00

Supervisor [Prof. Martha White](#)

Thesis [Online Predictions, RL and Water Treatment: A GVF Story](#)

Edmonton, Canada

Sept. 2021 – Jun 2023

National University of Sciences and Technology (NUST)

Bachelors of Science in Computer Science, CGPA 3.71/4.00

Islamabad, Pakistan

Sept. 2016 – Jun 2020

SELECTED PUBLICATIONS ([GOOGLE SCHOLAR](#))

WORK EXPERIENCE

University of Alberta, Canada

Research Assistant, [Vision and Learning Lab](#)

Sept 2026 – Present

[Advisor](#) [Prof. Li Cheng](#)

- I study perception for safe and reliable robot learning and planning, primarily focusing on learning from videos. My research also explores how agents can assess the feasibility of learned behaviors before executing them.

Edmonton Research Center (ERC), Huawei Technologies Canada Co. Ltd Jun 2023 – Sept 2026

Machine Learning Researcher

- I worked on multimodal learning, with a focus on video understanding. This included studying how vision language models can aid towards this goal and/or serve as useful knowledge priors.
- I also worked on vision-based inverse problems such as video/image restoration and distortion analysis.

University of Alberta, Canada

Research Assistant, [Reinforcement Learning and Artificial Intelligence Lab \(RLAI\)](#)

Sept 2021 – Jun 2023

[Advisor](#) [Prof. Martha White](#)

- I worked on designing temporal difference learning algorithms (TD) to make online and continual anticipatory predictions in high-volume and non-stationary systems.
- I also studied offline-to-online RL where the goal was to jump-start online RL agents by learning policies offline.

Qatar Computing Research Institute (QCRI)

Research Intern

Jan 2021 – Aug 2021

[Advisor](#) [Prof. Hassan Sajjad](#)

- I worked on understanding how neurons in a deep neural network (either individually or compositionally) work towards reaching a decision from input to the output.
- The work focused on analyzing how a trained architecture's internal state can be explained by mapping it to high-level interpretable concepts instead of relying on feature attribution methods.

Machine Learning Research Group, Aalto University

Jun 2019 – Nov 2019

Visiting Research Intern

Advisor [Prof. Arno Solin](#)

- I worked on depth estimation from unstructured multi-view image pose pairs. The task was to utilize cheap hardware on mobile devices and estimate depth following a stereo setup. We re-formulated the problem as a non-parametric learning task by introducing a temporal movement-induced Gaussian process prior for inter-frame reasoning. Our proposed gyroscope-driven kernel utilized low-quality MEMS sensors, and lifted the requirement of having full camera poses.

Applied Recognition Technology Laboratory, University of Insubria

Mar 2018 – Sept 2018

Visiting Research Intern

Advisor [Prof. Ignazio Gallo](#)

- I worked on multi-modal representation learning, mainly focusing on learning to project multiple modalities (images, audio, text) onto a shared latent space without utilizing multiple neural networks. I also explored the role of semantic relationships in the shared latent space for retrieval and verification tasks.

TEACHING EXPERIENCE

CMPUT 267 - Machine Learning I

Fall 2021, Winter 2022

University of Alberta, Edmonton, Canada

Introduction to Machine Learning

Winter 2020

National University of Sciences and Technology (NUST), Islamabad, Pakistan

Data Structures and Algorithms

Fall 2018

National University of Sciences and Technology (NUST), Islamabad, Pakistan

AWARDS & ACCOLADES

Graduate Research Scholarship, University of Alberta

2021-2023

Fully-funded scholarship for graduate studies (MSc. thesis).

Value: 25,197/yr CAD

UEAwards 2020, CAMP@TUM, Munich, Germany

Summer 2020

Undergraduate Excellence Award (UEAwards) is awarded to top 5 undergraduate students.

Value: 5900 CAD

UG Star Researcher 2020, NUST, Pakistan

2020

UGStar Researcher competition across the EECS school. I won the competition and the title.

Value: 150 CAD

Aalto Science Institute Summer Internship, Espoo, Finland

Summer 2019

I was awarded the research internship in ML group at Aalto University.

Value: 8900 CAD

Research Competition, Ulster University, UK

2019

All Pakistan research poster competition. I won third prize.

Value: 550 CAD

Dean's List for High Achievers

2016-2020

All semesters during undergraduate studies.

Value: 550 CAD

PATENTS

Learning Truncated Causal History Model for Video Restoration — Filed (Pending), January 2025

INVITED TALK(S)

[Learning to Process Streaming Videos Online with Histories](#) — Multimodal Weekly @ TwelveLabs, April 2025

REVIEW EXPERIENCE

ECCV 2026, ICLR 2025/2026, AAAI PC Member 2025/2026/2027, NeurIPS 2024/2025/2026, CVPR 2024/2025
